### Tools

#### Essential

- **Chain Saw**

A saw with a short bar (approx. 12") is generally more adaptable, a bit safer and less likely to have the chain damaged inadvertently.

Chain saw suppliers will advise on mandatory safety/ protective gear.

- **Billhook**

Can be picked up second hand (e-bay is a good source for those with internet access) but will usually need refurbishing. Old Pierce tools are good quality.

**The Woodsmiths Store** Stock a good range of billhooks

#### **Timeless Tools**

Have a large collection of Billhooks, Slashers, and edge tools, available to buy on line.

- **Axe**

Old Elwell axes 5lb -7lb are very suitable. Bahco (formerly Sandvik) do a large range of hatchets and axes. Two suitable models are

FGS-1.8-810 (axe) or HUP-1.0-650 (hatchet)

**Bahco** Tools are distributed by

- **Slasher or Slash hook**

Good quality old slashers can be sourced on the internet. Most hardware stores and creameries carry a Pierce slash hook. They are not ideal but are easy to get hold of. Chose ones with good straight grain in the handle, they won't break as easily.

- **Sharpening stone/s/File**

Bahco do a range of sharpening stones of varying quality and price.

LS-6160-23 (for fine sharpening), LS-PIERRE-FAUX (for coarse sharpening)

A Nicholson or Sandvik Mill File is very useful for taking out dints and initial shaping (most new tools are supplied with a ground edge, unsharpened and will require some initial shaping to put the correct bevel on them). (Hardware Store/Creamery)

- **Small Saw**

A 21" bow saw available from many hardware stores (or Bahco) will do, but a better option is to get a pruning saw. I use a Silky Fox - Zubat model, very good, but expensive. Samurai Saws are good value.

**Silky Fox** saws are available in Ireland from Eltjo van der Laan (071) 9644436. Their web site shows the tools ([www.mystworld.com/silkyfox/](http://www.mystworld.com/silkyfox/)).

Stock a range of pruning saws and PPE equipment

Bahco, Garden centres and some hardware stores may stock something cheaper.

### Useful

- **Mallet** For driving stakes. Can be home-made, a heavy lump hammer or small sledge can be used.
- **Loppers** Bypass action, heavy duty, good quality, should be available from a Garden Centre, Hardware Store or Creamery. Bahco do a good range.
- **Rope**
- **Hook-on-a-pole** A long stick (2-4m) with a natural hook on the end is useful when working on tall hedges. Can be cut from a hedge.
- **Long handle Pruning Saw** Similar to the Small Saw above, but fitted on a long (often telescopic) handle – used to free tangled trees. Silky Fox do high quality pruning saws. Something cheaper can be brought from Bahco or Garden Centes
- **Fencing pliers/Hammer** - for removing wire and staples
- **Pitchfork/Rake** - for moving brash (and fire control)
- **Spade/ Mattock** - for planting work and/or grubbing out
